Dear Sponsors,

To everyone who is considering sponsoring a child or teenager to get them out of the displaced camps and back into the schools, I want to sincerely thank each and every one of you. I come from a country that was torn apart by a civil war (Sri Lanka) when I was a child, and we got to where we are, in Canada, receiving world class education, all thanks to my parents' hard work and also to the kindness of many strangers we met along the way. I know first-hand how much difference one person can make in someone's life, especially when they are in need and are struggling to get back on their feet. Sometimes all they need is just a little help, a small gesture of kindness and support, to push themselves out of poverty and into a better future. I can guarantee you that your willingness to help these kids now will make a huge and lasting impact on their lives forever.

As most of you probably already know, many Langtang valley children have their education, room and board supported by foreign sponsors who send funds to put these students in boarding schools. This allows students to go to the main city (Kathmandu) to get an education, as there are no schools in the remote areas where they come from. However, not all kids have sponsors. These children usually come from the poorest families in Langtang, and it is often the case that their parents have minimal contact with the tourists (potential sponsors) who visit Langtang. In addition, there are kids who were fortunate enough to have families that were able to send them to schools without the help of foreign sponsors, however, many of these students have lost their parents or their livelihood during this devastating earthquake and can no longer continue their studies.

We're advocating on behalf of these kids for sponsorship right now for multiple reasons. They have already endured staggering loss. They will be reminded of the real extent of their loss when they realize that they can no longer continue their studies when their friends and relatives can. They might feel helpless and lose their motivation to push forward and build a better future for themselves. It is critical now, more than ever, that they feel hopeful and can see that they can still get out of this tragedy and keep going forward. They need structure and routine as soon as possible. We want to get them out of these camps and into schools, where they will be provided proper shelter and education in a more engaging and positive environment, away from the reminders of the constant trauma they have been facing. We have had the pleasure of working with some of the youth in this displaced camp and they volunteered out of their own free will to help us build some of the shelters; we see a lot of potential in them that we do not want to see wasted.

Unfortunately, time is not a luxury we have as the school term has already started, and if they begin their term too late, they might lose motivation if they fall too far behind. We fear that if we don't find them sponsors soon, they might have to take a year off and if they do, it is expected that only 40-60% of the students will actually return back to school the following year.

We put together a list of children needing sponsorship and organized them in terms of priority. Please see the message below from Pasang Bhutti about how to sponsor these kids and her own personal story about being a sponsored child. In this list, we gave students in Grade 10 the highest priority. In Grade 10, students pass one of the biggest hurdles in the school system in Nepal. The government conducts exams that students must pass in order to continue attending high school and post-secondary studies. If a student does not pass those exams, he/she is stuck for one more year.

Schools prepare these kids to take the test from a young age. Many schools will not accept new students from other schools because there is a risk that these students will lower their school performance average. A lot of schools are graded based on how these kids do on these exams.

Many youth who do not pass exams are left behind, and they lose confidence. Some of them drop out of school to look for jobs. Many end up moving to Qatar to do long hours of work in dangerous conditions at daily temperatures exceeding 50 degrees Celsius. 157 Nepalese migrants died between January and mid-November of 2014.

Most schools agreed to take Langtang students due to special circumstances. The exam is called the School Leaving Certificate. There are three students on top of our priority list. We managed to find sponsors for two of them. We registered the third student anyway, and set up an agreement with the school that we will find them a sponsor soon. We are doing this for the rest of the students on our priority list with the hopes that we will find sponsors soon so that these kids can continue their education as soon as possible.

It would be great if you can sponsor a child for the entire duration of their studies. However, if you find that you are not able to sponsor a child on your own, please let us know if you'd be interested in co-sponsoring. We will partner you with one or more sponsors who are also looking to co-sponsor. Also, if you feel more comfortable sponsoring the child by sending funds directly to the school, we can definitely arrange with the school to do this as well. If you have any questions or concerns about sponsoring, **please do not hesitate to contact us.**

Our team in Canada and on the ground in Nepal have worked really hard to put this list together. They spent a lot of time cross-referencing multiple lists with different people from the community to ensure the accuracy of the information presented. However, given the nature of this work, and also due to the current situations in Nepal, this is no easy task, and it might be possible that there are some errors in this document. We have made every effort to prevent this, but we are also making this document publicly available so that everyone in the community with any information about kids who have been sponsored can contact us if they find any misinformation, especially if they see a name here of a child who already has an active sponsor at the moment.

I want to take this opportunity to thank the people who worked day in and day out for the last three days to put together this document in a short amount of time. Our on-the ground volunteers, Amit Shapira, Eliza Johnstone, Lily Stracey, Lily Burnand, and Asmita Shrish, who worked really hard to gather all the information about these kids and our team back in Canada – Helen Truong, Prakash Paudel, Andrew U and Kenneth Wong for working very late into the night everyday for the last three days to cross-reference multiple lists and put together this document; I'm inspired by all your hard work. Thank you!

Sincerely,

Gayaanan Jeyanathan, PhD Candidate

A message from Pasang Bhutti to the sponsors. Pasang Bhutti is originally from the Langtang village and is currently living in Spain. She was sponsored by a German couple when she was young, which changed her life. Unfortunately, she has also lost her mom to this earthquake and understands the suffering of the many families from Langtang affected by this tragedy. She has started her own fundraising campaign to help her village and currently collaborating with us to get kids sponsored and back in schools.

Dear Sponsors,

Thank you so much for your kindness to the kids who have lost everything before having anything. Fate snatched love, care and affection, dreams, their parents and whole history just in a matter of seconds. But yes, we also believe that when one door closes for you, there is another way. So with the help of people like you, these kids can see a better future.

I was sponsored by a German couple, and I know how drastically my life has changed for the better. And I became a part of their family. There is a bond of love that exists between us that no one can explain. It is a mixture of love, care, respect, gratefulness and happiness.

Today, I am happy to assist you with the procedure of sponsoring a child from my village. I will briefly tell you the process of how to do this.

First, you can choose which child you want to sponsor, or we can choose a child for you based on our priority list. You will have direct contact with the child and his/her family throughout your sponsorship.

The **second** step is to pick the school that you want this child to go to. We have chosen four schools that we recommend for three reasons:

1. Most kids from Langtang go to one of these four schools;
2. They are relatively good schools in Kathmandu with good reputations; and
3. They have also agreed to provide subsidized fees for the children from Langtang affected by the earthquake. The subsidized fees are listed in this package.

You can also look for a school in Kathmandu yourself, and we can help you get the child registered there.

The school fees per month will be around \$100USD/month (this varies depending on the school). This includes food, shelter, education, uniform and books. The child will be in one hostel with many other kids that are also from his/her village. They will be taken care of very well by the hostel teachers and other helpers. During the holidays, they can of course go to visit their family or family can come and visit them.

Optional extra charges cover medical expenses and school supplies (pens, pencils, school bags, etc). This will be approximately \$150 USD per year on average.

You will receive the academic progress report of the child along with the letter written by him/her twice per year.

You can have personalized information about the child from the teachers. If you are interested, I can put you in contact with the child, his/her family and the school whenever you'd like.

If you need any assistance I am here. You can contact me anytime.

Kind Regards and Namaste!

Pasang Bhutti
